FOUR YEAR OLD SESSION 3

JANUARY 2021 - MARCH 2021

I SPY ABCs AND 123s

Tatiana Arkhipov

This writing prep class will focus on hand-eye coordination, a foundational skill for elementary school success. The children will use logic, riddles and patterns to engage their fine motor skills.

Tatiana has loved math since grade school, with credit given to a very passionate and creative elementary math teacher. She is excited to pass along that passion to her young students and show them math is interesting and fun.

LITTLE LABORATORY

Kristin Lejarde

Pouring, stirring, mixing and combining, our Little Laboratory will come to life as we hypothesize and test our theories. This investigative class will be both exciting and messy fun!

Mrs. Kristin grew up thinking Ms. Frizzle from the Magic School Bus was a kindred spirit. She loved tinkering at home, taking things apart to see what made them "tick." Mrs. Kristin loves watching her students' eyes light up with understanding of new concepts.

THE SENSORY EXPLORERS

Maggy Dujowich

In this class we will be combining our 5 senses to explore the potential that each child has. We will be connecting to nature, painting, planting, and playing while using all of our senses. It will be a class full of surprises and learning experiences.

Maggy has a passion for creating engaging, messy, sensory experiences and exploring the world around her. She enjoys incorporating her love of nature and loose parts into her teaching.
